

Mono 31

Monochrome LED text and animation displays are a cost-effective addition to a message system. They may also be used as an alternative to full color LED. Although sometimes used as the entire video display, they are most often used as message centers for promotions and statistical information and are incorporated into the cabinet structure of a total scoring system along with a full color video board. Many fascia ribbons are also monochrome due to the lower cost.

Technische Daten

Kalibrierte Helligkeit	2750 nits
Kontrast	1000:1
Physikalische Auflösung	31 mm
Hor. Betrachtungswinkel	120°
Vert. Betrachtungswinkel	44°
Optimaler Betrachtungsabstand	35 meter
Gewicht	5.3 kg / m ²
Mittlere Leistungsaufnahme	.11 Watt (per pixel)
Max. Leistungsaufnahme	.28 Watt (per pixel)
Temperaturbereich	Operating: -20°C <> 40°C Storage -20°C <> 60°C
Outdoor-Eignung	IP 54
Bildgröße	Unlimited
Lebensdauer	100.000h [half brightness]
Verarbeitung	13 bit
