

SportsBox SP4

The SportsBox (SP4) creates and manages content for large area LED displays in sport arenas.

Combine live images with pre-recorded advertising movies and sports specific scoreboard information on your display, without requiring a full investment in an AV studio. Equipped with sports specific scoreboard software, game related information and data animation generator, this unique product expands your LED video display into a multi functional solution offering new advertising possibilities as well as increasing the experience of the sports fans.

Technische Daten
