

Events Controller

A fully integrated show control system which enables the control of all LED and Projection Displays as well as all other

This includes the Catalyst System™, automated and conventional lighting devices, smoke machines, image generators, truss motors, hydraulics and much, much more.

A state-of-the-art show control system, Barco's Events Controller provides full image processing and system control. Besides all D320 features, it also brings unique added features like 'Positracking™', the ability to recreate the exact position and status of all show devices as seen at any specific point during the performance. The Events Controller is giving you total control over every split second of the show.

The ultimate in event control

The Barco Events Controller can be used in any type of application where total event control is required such as:

Music Touring

Exhibitions and Car Shows

Public Events

BARCO

Visibly yours
