

# ViewScape

Multi-input, multi-display control device

The ViewScape is a multi-input, multi-display control device, allowing you to show a multitude of windowed inputs onto a set-up of combined displays. Able to control both projection as plasma displays directly and daylight displays indirectly, the ViewScape offers a wide range of effects such as alpha blending, chroma keying, z-order control and edge blending. Barco's ViewScape comes fully equipped with all necessary hardware and control software.
