

1x1 rental structure

The DLite rental structures enable ultra-fast build up and breakdown of a display.

Designed from flightcase to display, the build up process is streamlined, for easy and safe operations.

Particular attention was paid to logistic details such as sizes of flightcases for optimal fitting into lorry trailers or stockability of flightcases for storage.

Engineered with the feedback of some of Barco's most demanding and long standing customers, the rental structure was made by professionals for professionals.
