

Acsar

D-Cine Alternative Content Switcher and Router

A powerful scaler and router, designed to convert any analog or digital signal to the DVI digital input of the D-Cine Premiere® digital head.

Modular convenience

Quick and easy configuration - For the permanent connection of any combination of fixed inputs plus the connection of temporary sources. Compatible with almost any digital or analogue input.

Convenient image formatting, switching and routing

Advanced Barco pixel map processing for the scaling and reformatting of any standard or HD video or PC input to the native 1280x1024 format and of the D-Cine digital head. Seamless switching between sources.

Simple operating

With a wide range of operating features, a choice of a simple front panel or remote control via the D-Cine LCD panel or Barco RC5 infra-red controller, plus a preview monitor output for cueing and the seamless switching of selected video inputs.
